

FLORIDA FOOT AND ANKLE SPECIALISTS

Highlights

- By combining antifungal, cosmetic and low molecular weight agents, Tolcylen™ Solution is the only product of any kind to simultaneously treat fungal infections and nail appearance in one formulation.
- Scientifically proven and FDA approved to penetrate and carry anti-fungal agents through the nail plate.
- Most important ingredients are Undecylenic + Tolnaftate – lower molecular size and weight than other antifungal medications (ability to penetrate and get to the infected tissue and nails).
- Cosmetic ingredients have been clinically shown to improve nail appearance of fungal and non-fungal nails.
- Provides both curative and preventive treatment to infection sites of the skin, including the cuticle, hyponychial and nail fold areas.
- ~70% cure rate of fungus at 6 months.**

Directions:

Apply a thin layer twice a day (morning and at night) for 6 months. Place special focus on applying around and under the nail edges, especially by the cuticle.

Other tips for enhancing treatment and preventing recurrence:

1. Replace or disinfect shoe gear with anti-viral (Lysol) solution/spray and/or laundry. If disinfecting shoe gear, allow 48 hours for the chemicals to work and the shoe to dry before wearing.
2. Wash your bathmat and avoid sharing with family.
3. Wash all socks in hot water with bleach to kill any fungi.
4. Scrub your shower and disinfect it with a bleach-based cleanser.
5. Wash your feet daily, making sure to thoroughly dry them afterward, especially between the toes where moisture can get trapped.
6. Ensure you do not have extra moisture on your feet while wearing socks and shoes.
7. Alternate your shoes when possible.
8. Don't share nail polish, nail clippers or your Tolcylen treatment with anyone else!
9. Always protect your feet in public.
